

# STUDY IN INDIA...

## *A Comprehensive Guide to the Best Universities*

# *Preface*

India is a vast and diverse country and so is its educational system. The Indian higher education system is the third largest in the world, next to the United States and China. Since independence, India is continuously progressing and becoming vibrant and diverse in the education field. From the modern and cutting edge to the traditional, Indian education ranges from exposure to the latest advancements of science and technology like Virtual and Augmented Reality, Artificial Intelligence and Cognitive Computing to Yoga, Ayurveda, Sanskrit and classical dances. This vastness of the Indian education system directly translates to enhanced opportunities for its students and global learning for an all-round academic and personal development.

In India there are both public and private universities. Public universities are supported by the Government of India and the state governments, while private universities are mostly supported by various bodies and societies. Universities in India are recognised by University Grants Commission (UGC) which is a body of central government that provides support to the government recognized universities and colleges with funds. In addition, there are Professional Councils which control different aspects of accreditation and coordination.

In Indian Higher Education sector, Universities can be by and large categorized into four types depending on the manner in which they were set up. These are central universities, state universities, deemed universities and private universities. Besides these four, there are institutes which are designated as institutes of national importance.

Central universities-Central universities are established by an Act of Parliament and are under the purview of the Department of Higher Education in the Education. As per the records of education ministry there are 54 central universities of India.

State universities- State universities are run by the state government of each of the states and territories of India and are usually established by a local legislative assembly act. As per the UGC list, there are 438 state universities.

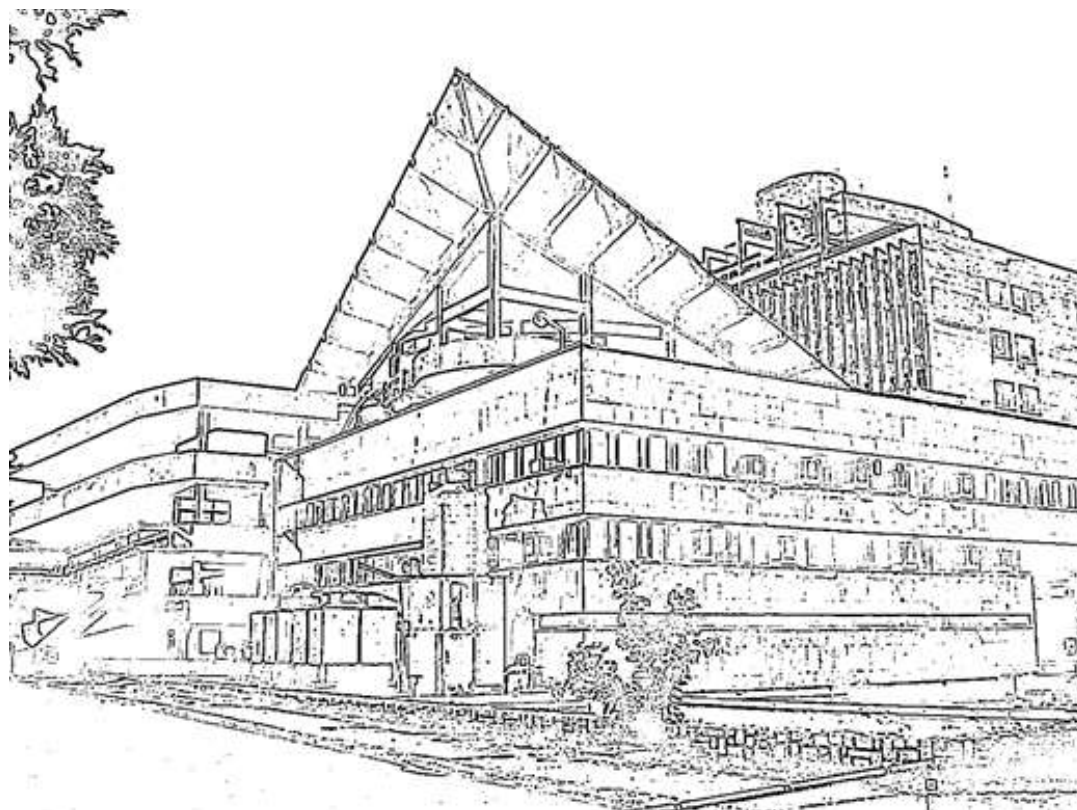

Deemed universities-An Institution of Higher Education, other than universities, working at a very high standard in specific areas of study, can be declared by the Central Government on the advice of the UGC as an Institution 'Deemed-to-be-university'. Institutions that are 'deemed-to-be-university' enjoy academic status and privileges of a university.

Private universities- Private universities are established by an act of a local legislative assembly and listed by the UGC in the Gazette upon receiving the act. Recognition by the UGC is required for the university to operate.

National institutes of importance-Institute of National Importance (INI) is a status that may be conferred on a premier public higher education institution in India by an act of Parliament of India, an institution which "serves as a pivotal player in developing highly skilled personnel within the specified region of the country/state". Institutes of National Importance receive special recognition, higher autonomy and funding from the Government of India.

As mentioned earlier, the coordination and determination of standards in Universities and Colleges is entrusted to the UGC and other statutory regulatory bodies, keeping this in mind the research team has shortlisted a few popular universities of different states/UTs in India. These universities are all recognized and have been granted accreditation by UGC and statutory bodies like National Assessment and Accreditation Council (NAAC) and National Board of Accreditation (NBA). This manual is an endeavour to inform the students of the wide range of universities and the scope of higher education in India.

## ii. Jawaharlal Nehru University

Jawaharlal Nehru University is the foremost university in India, and a world-renowned center for teaching and research. Ranked number one in India by the National Assessment and Accreditation Council (NAAC) with a Grade Point of 3.91 (on a scale of 4), JNU was ranked no 3 among all universities in India by the National Institutional Ranking Framework, Government of India, in 2016 and no 2 in 2017.

JNU also received the Best University Award from the President of India in 2017. NU was the first to offer courses in foreign languages in an integrated five-year MA programme. At the Master's level, where most of the schools begin their academic programme, training is largely oriented towards single disciplines (although all M.A. students are encouraged to do a few courses outside their subject) but at the research level the disciplinary boundaries become more permeable.

Work in overlapping or borderline areas – e.g., between environment and literary studies, economics and science, sociology and aesthetics, or linguistics and biology – is not uncommon among the Ph.D. students of JNU.

Not only are the research scholars encouraged to cross the invisible walls around disciplines, the relationship between the academia and the world outside also remains negotiable, often resulting in mutually beneficial collaboration in areas that form crossroads for developing an understanding of society, culture and science.

## ix. School of Planning and Architecture Delhi

School of Planning and Architecture Delhi was recognized as "An Institute of National Importance under an Act of Parliament" in 2015. The school is a specialized University, only one of its kind, which exclusively provides training at various levels, in different aspects of human habitat and environment.

The school has taken lead in introducing academic programmes in specialized fields both at Bachelor's and Master's level, some of which are even today not available elsewhere in India. The school, in striving for excellence, has always been in the lead in extending education and research to new frontiers of knowledge.

Human habitat and environment being the basic concern of the school, the spectrum of academic programmes is being continuously extended by providing programmes in new fields and emerging areas for which facilities are not available, as yet, anywhere else in the country.

School offers planning, architecture and design courses both at undergraduate and postgraduate levels. While the Bachelor of Architecture course is one of the oldest in the country, the highly successful Bachelor of Planning course was started in 1989. ## 6. WEST BENGAL

### i. Presidency University

Presidency University has a unique place in history. It was one of the first institutes of Western-type higher education in Asia. It was formerly known as Hindu College and Presidency College. Established in 1817, it is probably the oldest institution in India to have no religious connection.

Over the next hundred years and more, Presidency College was Bengal's pre-eminent centre of higher learning. Although a Constituent College of Calcutta University, it preserved a tradition of research matched by few universities in India. This gave a unique dimension to its undergraduate teaching.

The formal establishment of Presidency University in July 2010 allows it to refashion its venerable traditions and continuing strengths into a leading institution of the future. In recognition of its rich heritage of academic excellence the Legislature of West Bengal conferred the status of a University on Presidency College on 7th July of 2010. This was enacted with a view to enabling Presidency University to function more efficiently as a centre of teaching and research in various branches of learning, especially in Humanities, Social and Basic Sciences, and promoting advancement and dissemination of knowledge and learning in the service of the society and the nation.

### iii. Indian Institute of Technology, Kharagpur

Indian Institute of Technology Kharagpur, fondly referred to as IITKGP by its kin, right from its inception formed the bridge between India's ancient wisdom and modern technology. IITKGP echoes Indian ethos of enlightenment. On the other hand, the inspiration was the model of education imparted at institutions like MIT with eminent faculty from Europe who joined the Institute in its formative Years. IIT Kharagpur started its journey in the old Hijli Detention Camp in Eastern India, where some of the country's great freedom fighters toiled and sacrificed their lives for India's independence. This is possibly one of the very few Institutions of the world that started life in a prison house. This Phoenix that rose from the struggles of a colonized nation, IITKGP today is a confluence of world class multidisciplinary courses, a cauldron of academic and corporate research, a thriving hub of entrepreneurship and an enabler of best-in-class placement. IITKGP is not just the place to study technology, it is the place where students are taught to dream about the future of technology and beam across disciplines, making differences enough to change the world.

#### iv. Indian Statistical Institute, Kolkata

The Institute was registered on 28 April 1932, as a non-profit distributing learned society under the Societies Registration Act (XXI of 1860) and is now registered under the West Bengal Societies Registration Act XXVI of 1961 amended in 1964. Sir R.N. Mookerjee accepted the office of the President of the Institute, and held this office until his death in 1936. During the 1920s and until the mid-1930s, all or nearly all the statistical work done in India, was done single-handedly by Mahalanobis. The early statistical studies included analyses of data on stature of Anglo-Indians, meteorological data, rainfall data, data on soil conditions, etc. Some of the findings of these early studies were of great impact in the control of floods, development of agriculture, etc., and led to the recognition of Statistics as a key discipline. Primary activities of ISI are research and training of Statistics, development of theoretical Statistics and its applications in various natural and social sciences. Originally affiliated with the University of Calcutta, the institute was declared an institute of national importance in 1959, through an act of Indian parliament, Indian Statistical Institute act, 1959. ISI functions under the Ministry of Statistics and Programme Implementation (MOSPI) of the Government of India.

## v. Jadavpur University

To trace the history of Jadavpur University is to trace a part of India's freedom movement, at least from the Swadeshi Movement onwards. It was 1905 -1906. Bengal stood divided. The times were feverish.

The hegemony of the British establishment had to be challenged. Education had to play a new role in this changed scenario. It had to become a new form of resistance through which the emergent nationalist spirit could be propagated. With this in mind the National Council of Education (NCE) came into being.

Its primary aim was to impart education - literary, scientific and technical on national lines exclusively under national control. To achieve self-reliance, through education. The foundation of the NCE was made possible by the munificence - scholarly as well as monetary - of the likes of Raja Subodh Chandra Mallik , Brajendra Kishore Roychowdhury of Gouripur as well as Sir Rash Behari Ghosh (first President of NCE), poet Rabindranath Tagore and Sri Aurobindo Ghosh.

In 1910 the Society for the Promotion of Technical Education in Bengal which looked after Bengal Technical Institute (which later became College of Engineering and Technology, Bengal) was amalgamated to NCE. NCE henceforth looked after the College of Engineering and Technology, Bengal which by 1940 was virtually functioning as a University. After Independence, the Government of West Bengal, with the concurrence of the Govt. of India, enacted the necessary legislation to establish Jadavpur University on the 24th of December 1955.

Now Jadavpur University has successfully established itself as a foremost Indian University with a vast repertoire of courses offered, an enviable list of faculty members and has come to be known for its commitment towards advanced study and research.

#### iv. National Law School of India University

NLSIU was the first National Law University established in India in 1986. The premier law school was set up with a mission to pioneer legal education reforms, and to anchor the transformation of the Indian legal system through research and policy interventions.

Consequently, the NLSIU was one of the first institutions in the country to introduce the five-year integrated law degree at the undergraduate level with the commencement of the first batch in 1988. And for over 30 years now, the University has irrefutably remained a leader in the field of legal education in the country.

This long-standing record has been possible due to the strong collaborations between legal academics, the Bar, the Bench and the State Government of Karnataka. NLSIU's sprawling 23-acre campus in Nagarbhavi, Bengaluru, is home to a vibrant student community that includes student associations and events. Students get to engage in moot courts and debates at a competitive level, both domestically and internationally.

Equipped with a state-of-the-art library, multiple academic centres, student housing and essential facilities, the University is committed to serve as a breeding ground for future leaders. The five-year integrated Undergraduate B.A. LL.B (Hons) Degree Programme is the flagship degree at NLSIU that offers students training in a range of legal and non-legal subjects. NLSIU pioneered this five-year programme in India with an intention to provide a strong foundation upon which students can choose to pursue professional options or further academic opportunities.

## vii. Vellore Institute of Technology, Vellore

It was established under Section 3 of the University Grants Commission (UGC) Act, 1956, and was founded in 1984 as a self-financing institution called the Vellore Engineering College. The Union Ministry of Human Resources Development conferred University status on Vellore Engineering College in 2001. VIT was established with the aim of providing quality higher education on par with international standards. It persistently seeks and adopts innovative methods to improve the quality of higher education on a consistent basis. The campus has a cosmopolitan atmosphere with students from all corners of the globe. Experienced and learned teachers are strongly encouraged to nurture the students. The global standards set at VIT in the field of teaching and research spur us on in our relentless pursuit of excellence. In fact, it has become a way of life for us. The highly motivated youngsters on the campus are a constant source of pride. Our Memoranda of Understanding with various international universities are our major strength. They provide for an exchange of students and faculty and encourage joint research projects for the mutual benefit of these universities. Many of our students, who pursue their research projects in foreign universities, bring high quality to their work and esteem to India and have done us proud. With steady steps, we continue our march forward. We look forward to meeting you here at VIT.

## **ix. Indian Institute of Space Science and Technology (IIST)**

**I**ndian Institute of Space Science and Technology (IIST), situated at Thiruvananthapuram is a Deemed to be University under Section 3 of the UGC Act 1956. IIST functions as an autonomous body under the Department of Space, Government of India. The idea of such an institute was mooted keeping in mind the need for high quality manpower for the Indian Space Research Organization, one of world's leading scientific organizations engaged in space research and space applications. The institute is the first of its kind in the country, to offer high quality education at the undergraduate, graduate, doctoral and post-doctoral levels on areas with special focus to space sciences, space technology and space applications. IIST was formally inaugurated on 14 September 2007 by Dr. G. Madhavan Nair, the then Chairman, ISRO and was temporarily housed in the premises of Vikram Sarabhai Space Centre, very close from where ISRO built and launched its first rocket. Both the founding fathers of the institute, Dr G Madhavan Nair and Dr B.N. Suresh, the latter being the first Director of IIST, played a very important role in the formation of the institute, facilitating its establishment and contributing to its vision. Dr B.N. Suresh piloted the institute from the conception of the idea to its realization in a permanent campus near Thiruvananthapuram in 2010. The institute had the enviable reputation among all educational institutions since it had Dr A.P.J. Abdul Kalam, the renowned technocrat and former President of India as its very first Chancellor. Prof U.R.Rao, the eminent space scientist and one of the former Chairman, ISRO guided the institute as its second Chancellor with distinction for two years from 2015 to 2017. Dr B.N. Suresh, the founder Director of IIST has assumed charge as the institute's third Chancellor since November 2017.

# Annexure -1 On CUET

## FREQUENTLY ASKED QUESTIONS

Overview about the rationale of CUET (UG) - 2022		
1.	<b>What does NTA stands for?</b>	NTA stands for the National Testing Agency (NTA). It is established by Ministry of Education, MoE (Earlier known as Ministry of Human Resource Development-MHRD) as an independent/ autonomous, self-reliant and self-sustained premier testing organization.
2.	<b>What is CUET (UG) – 2022?</b>	<p>CUET (UG) – 2022 stands for Common University Entrance Test UG 2022.</p> <p>CUET (UG) – 2022 will provide a single window opportunity to students to seek admission in any of the Central Universities (CUs) across the country, for the academic session 2022-23.</p> <p>CUET (UG) – 2022 will provide a common platform and equal opportunities to candidates across the country, especially those from rural and other remote areas and help establish better connect with the Universities.</p> <p>It is a single entrance test for admission to Central Universities and other participating Institutions which will be admitting the candidates to their UG courses for the academic year 2022-23 based on the marks/NTA Score secured by them in this test.</p>
3.	<b>How is CUET (UG) – 2022 going to be helpful to a student</b>	<p>The Common University Entrance Test CUET (UG) – 2022 will be helpful to a student in the following ways:-</p> <ol style="list-style-type: none"> <li>i. In the past, students used to be under stress to secure more than 95% marks in Class XII Board Examination so as to get admission in the University of their Choice. With the introduction of CUET (UG) – 2022, the stress on them for securing very high marks in the one and only Board Examination stands reduced.</li> <li>ii. Marks given by different Boards vary widely on account of the typology of questions and the scoring pattern. These things will now get standardised under CUET (UG) - 2022.</li> <li>iii. The question paper pattern in CUET (UG) – 2022 will be objective type comprising Multiple Choice Questions and hence evaluation will be objective. In this manner, subjectivity in evaluation of the descriptive type of papers in the traditional Class XII exams of different Boards will not handicap the candidates in getting admission to the University of their choice.</li> <li>iv. CUET (UG) – 2022 will be held in the Computer Based Test (CBT) mode where result processing will be done through technology with no human intervention.</li> </ol>

		<p>v. CUET (UG) – 2022 will be based on Class XII syllabus and hence candidates of Class XII need not prepare for it separately.</p> <p>vi. In CUET (UG) – 2022, students have a wide range of options-i.e. 27 subjects, 33 Languages and General Test to choose from. They can select the Subject/Language/General Test of their choice, as per the requirements of the University where admission is sought. They can also choose any of the 13 languages specified therein as medium of their test.</p>
4.	<b>How will The Common University Entrance Test CUET (UG) – 2022 address the diversity of the students across the country?</b>	<p>The Common University Entrance Test CUET (UG) – 2022 will provide a common platform and equal opportunity across the country especially to those students coming from rural and urban areas including candidates from the three National Boards CBSE, AICSE and NIOS.</p> <p>In CUET (UG) - 2022, students have a wide range of options-i.e 27 subjects, 33 Languages and General Test to choose from. They can select the Subject/Language/General Test of their choice, as per the requirements of the University where admission is sought. They can also choose any of the 13 languages specified therein as medium of their test.</p>
5.	<b>I secured 99% marks in Class XII but did not get admission in the desired university.</b>	<p>In the past, candidates had this grievance that though they scored 99% in Class XII, they could not get admission in the Universities of their choice. This was basically because of varied typology of questions and scoring pattern across different Boards in the country.</p> <p>These things will now get standardized with the introduction of CUET (UG)- 2022.</p> <p>The question paper pattern in CUET (UG) – 2022 will be objective type comprising Multiple Choice Questions and hence evaluation will be objective. In this manner, subjectivity in evaluation of the descriptive type of papers in the traditional Class XII exams of different Boards will not handicap the candidates in getting admission to the University of their choice.</p>
6.	<b>How will I prepare for both CUET (UG) – 2022 and the Board Examinations?</b>	<p>The syllabus for the subject/domain tests of CUET (UG) – 2022 will be based on Class XII so that there is no pressure on the candidates to prepare for both the exams.</p> <p>The effort that would be required to do well at CUET (UG) – 2022 will also help candidates to prepare well for their Board Examinations. Thereby, it would strengthen their learning.</p>
7.	<b>What does the National Education Policy Say?</b>	<p>The National Education Policy has clearly elucidated that the entrance to Higher Education should be through Common Entrance Test at the national level so that there is uniform standard of bench marking of candidates.</p>

8.	<b>Will the Board Exam become redundant now?</b>	<p>The basic eligibility criterion for entrance into Universities remains unchanged which is that a candidate must have passed the Class XII examination from any recognized Board or equivalent.</p> <p>In fact marks in grade XII for eligibility will vary across programs and Universities.</p> <p>Moreover Board examinations are achievement tests whereas CUET (UG) –2022 is a selection Test.</p> <p>Hence, Board Exams at Class XII level are not likely to become redundant. The basic eligibility criteria is a key factor for admission to all University and other examinations such as JEE &amp; NEET at the National Level.</p> <p><i>The principles for University Entrance Exams will be similar. The National Testing Agency (NTA) will work to offer a high-quality Common Aptitude Test, as well as specialized common subject exams in the sciences, humanities, languages, arts and vocational subjects. These exams will test conceptual understanding and the ability to apply knowledge and shall aim to eliminate the need for taking coaching for these exams. Students will be able to choose the subjects for taking the test, and each university will be able to see each student's individual subject portfolio and admit students into their programmes based on individual interests and talents.</i></p>
9.	<b>How does CUET (UG) – 2022 provide more flexibility and options for me to choose from?</b>	<p>In CUET (UG) - 2022, a candidate may take maximum 09 tests in the following manner:</p> <ul style="list-style-type: none"> <li>• 02 languages from Section IA and Section IB taken together, maximum of 06 Domain Subjects from Section II and General Test from Section III.</li> </ul> <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> <li>• Maximum of 03 languages from Section IA and Section IB taken together, maximum of 05 Domain Subjects from Section II and General Test from Section III.</li> </ul>
10.	<b>How will CUET (UG) - 2022 become a great Social equalizer?</b>	<p>The Common University Entrance Test CUET (UG) – 2022 will provide a common platform and equal opportunities to candidates across the country, especially those from North-East and from rural and other remote areas and help establish better connect with the Universities. It will test conceptual understanding and the ability to apply knowledge and shall aim to eliminate the need for taking coaching for these exams.</p>
11.	<b>Will this change not be stressful for students of the current batch of class XII as they have mostly studied online due to COVID-19?</b>	<p>The issue has been considered and a decision taken to base the CUET (UG) – 2022 on the Class XII syllabus only.</p> <p>Moreover, to ensure that deletion of some topics from the syllabus across Boards does not impact the Candidate performance in CUET (UG) - 2022, overall choice of 10 questions or more is being provided in different Sections.</p>

12.	<b>The suggested system is less flexible than the admission process organically evolved by Universities over years?</b>	<p>Candidate, as the candidate can choose upto 9 Subjects from Section 1A and 1B (languages), Section 2 (Domain specific Subjects) and Section 3 (General Test).</p> <p>He will have the flexibility to choose any one language as his medium for the test, from out of the 13 specified languages.</p>
13.	<b>What about the flexibility and autonomy of Universities? Will it not be curtailed?</b>	<p>The Counselling process is to be conducted by the respective Universities. The Universities will be preparing their respective Merit Lists for the offered programmes and may follow the same practice as in earlier years to fill the seats that fall vacant due to dropouts.</p>
