

Criteria for Stream Allocation

To ensure a fair and transparent allocation of academic streams, the following criteria have been adopted:

1. Weightage Distribution: Streams were allocated based on a merit list created using the following weightage system:

- **10%** from the best marks obtained in Periodic Tests.
- **40%** from the Term 1 examination.
- **50%** from the best score between the Pre-board and Common Pre-board examinations for each subject.

2. Calculation Process:

- Marks were compiled for each student based on the above weightage distribution across all subjects.
- The total score was then calculated by summing up the weighted scores from all subjects.
- A merit list was created based on these total scores.

3. Stream Allocation:

- Streams were allocated to deserving candidates strictly as per the merit list.
- The highest scorers were given priority for their preferred streams.
- In case of a tie, additional factors such as overall academic consistency and co-curricular participation may have been considered.

This process ensures that stream allocation is done objectively, recognizing students' academic performance throughout the year.

NOTE:

Session will commence from 2nd April 2025
